

Lokeshwar S

Product Manager — Growth & AI Products

Bengaluru, India · lokeshwar.product@gmail.com · +91 74023 10862 · [LinkedIn](#) · lokeshwar.xyz

SUMMARY

Product Manager with 2+ years building AI and growth products for a B2B SaaS market-intelligence platform, after two years in software engineering. Launched an LLM assistant with 29% four-week retention, tripled high-value lead mix, and built AI workflows adopted across the PM organisation.

SKILLS

Growth & Experimentation: A/B Testing · Activation & Funnel Optimization · SEO-Led Acquisition · Feature Gating · Lead Quality & Segment Mix

AI & Data: LLM Product Development · Model Context Protocol (MCP) · AI-Assisted Requirements & Analysis · SQL · Google Analytics · Looker Studio · Google Apps Script

Domain & Tools: B2B SaaS · Fintech · Figma · Notion · Intercom

EXPERIENCE

Tracxn — Senior Associate Product Manager

Associate PM → Senior Associate Product Manager · mentor 1 Associate PM

May 2024 – Present

B2B SaaS market-intelligence platform (~30K MAU) serving investors, corporates, government, and sales teams

- Achieved ~29% four-week retention on a newly launched LLM-powered AI Assistant built over Tracxn's proprietary market data, at ~7 queries per user per week.
- Identified discovery as the adoption bottleneck; launched in-product entry points (list-page filter, home-dashboard touchpoint) that grew weekly users ~4x to ~15% of weekly-active paid users.
- Tripled the high-value lead mix from <5% to ~15% of signups by reorienting content and landing pages toward six core customer segments that convert at higher value.
- Cut human-handled support tickets ~7% in one month by routing common queries to the AI Assistant.
- Built AI requirement-writing workflows adopted by ~25–30 of ~30 hands-on PMs, cutting requirement-writing time 20–80% depending on scope.
- Own the acquisition surface — SEO landing pages, the Lite product, first-user experience, home dashboard — that grew from ~40 to ~600 signups/day over two years.

Capgemini — Software Engineer → Senior Software Engineer

Sep 2021 – Nov 2023 | Financial Services

Career break Nov 2023 – May 2024 (transition into product management)

- Led a 7-person team migrating investment accounts between two major Canadian banks (RBC–HSBC Canada), engineering financial data transfer and validation at <0.1% error rate across a sub-48-hour cutover where an error was not recoverable.
 - Cut load-activity time ~50% by identifying process inefficiencies and re-architecting the transfer routines — large impact from a lean team.
 - Authored business requirement specifications and resolved cross-team dependencies across the tech stack — requirements ownership that now anchors my product work.
-

EDUCATION

B.E., Computer Science & Engineering — Peri Institute of Technology (Anna University), 2021

LEADERSHIP & ACTIVITIES

Head, Entrepreneurial Development Cell — Peri Institute of Technology: organized guest-speaker sessions, industry visits, and campus-wide events for the student body.
